

ASA Corporate Supporter Program

ASA is pleased to introduce a new corporate sponsorship program called the ASA Corporate Supporter Program. We believe in forming collaborative relationships that allow ASA and its corporate supporters to advance the goals of the anesthesiology specialty. By working together, both ASA and its corporate supporters can better serve and communicate with the anesthesiology community.

In this new program, ASA is bundling many events, programs and other assets into two levels of participation. At the highest level, ASA is offering two sponsorship packages: **ASA Industry Supporter** and **ASA Practice Management Supporter**. These packages are multi-year agreements, designed to allow organizations year-round affiliation with ASA and shared sponsor recognition at the Annual Meeting and Conference on Practice Management. Participating companies will also have the right to use the official ASA Industry or ASA Practice Management Supporter logo/mark to promote their affiliation with ASA .

ASA is proud to acknowledge and recognize the following inaugural ASA Corporate Supporters for their generous support of the American Society of Anesthesiologists.
